**A. [2018]: Joining forces for GenRes and biodiversity management (CSA)**

Activities will provide a framework in which the existing mosaic of European, national/regional structures can join forces to develop and implement ambitious approaches and strategies for the management of crop, forest and animal GenRes. In addition to advancing individual roadmaps, inventories and information tools for crop, forest and animal GenRes, cooperation between the different communities shall foster GenRes conservation within a wider (agro) biodiversity context. Particular care shall be taken to building and widening capacities across Europe and neighbouring countries (including Mediterranean countries), exchanging best practices, harmonising standards as well as sharing resources and data.

## HORIZON 2020 PROPOSAL EVALUATION

Work as an expert

The European Union institutions appoint external experts to assist in the evaluation of grant applications, projects and tenders, and to provide opinions and advice in specific cases.

Being an expert for the European D...

- In particular, experts assist in:
  - Evaluation of proposals, price applications and contracts.
  - Monitoring of actions, grant agreements, public procurement contracts.
- In addition, experts provide opinion and advice on:
  - Preparation, implementation and evaluation of EU programmes and design of policies.

In order to select experts, the European Union institutions publish enquiries into the expression of interest (see the below) detailing the selection criteria, the required expertise, the description of the work, work duration and the conditions.

- ### GenRes Bridge main objectives
- ✓ **increase the effectiveness** of sustainable management for crop, forest and animal GenRes
  - ✓ **widen capacities** to increase the knowledge on conserved diversity of crop, forest and animal GenRes
  - ✓ **enhance the conservation** status of GenRes
  - ✓ **improve the services** offered to the end-users of GenRes
  - ✓ Present outcomes at **high-level policy events**
  - ✓ **Develop integrated conservation strategy** for (forest, animal and crop) genetic resources in Europe

- ### Develop integrated conservation strategy for (forest, animal and crop) genetic resources in Europe
